

Call for Proposals for the 2010 Teaching with Technology Conference

A Texas A&M University Systemwide Event

PLEASE DISTRIBUTE TO FACULTY

Instructional Technology Services (ITS) at Texas A&M University is pleased to announce a call for proposals for our annual Teaching with Technology Conference. 2010 marks the sixth year we will coordinate the Conference and the third year we continue to expand the event to the entire Texas A&M University System.

The theme this year is “Authentic, Engaging Education,” which highlights the transition we are experiencing in higher education to become more connected with students and the ways they interact with technology in their daily lives. We openly encourage anyone interested—including students—to both submit a presentation proposal and attend the event.

We request your participation to make this year’s Conference yet another successful learning and networking event. As a presenter, you will be able to share your academic knowledge and professional experience with colleagues, demonstrate innovative teaching and learning methods, and help advance technology-enhanced instruction in higher education. Please consider the following presentation topics as suggested areas in which you can submit a proposal:

- **enriching course experiences through technology-enhanced instruction**
- **sharing ideas and techniques to enhance student learning**
- **using learning management systems, such as Blackboard Vista, to facilitate teaching and learning**
- **designing, delivering, and assessing effective instructional design for distance or hybrid courses**

The due date for proposals is **Friday, November 13, 2009**. Visit the Conference webpage at itsinfo.tamu.edu/twtc and click the “Proposals” link to submit the short information form. Please make your presentation description as specific as possible so that we can best schedule the Conference program to benefit all the presenters and attendees. We will email acceptance notifications by Friday, December 11.

The Conference will span a day and a half and will be held **February 10-11, 2010**, in Rudder Tower in College Station, Texas. There is no cost to attend the Conference, but attendees are encouraged to register now to allow for better event planning. Registered attendees will be served meals on both days.

For additional, up-to-date information about the event, visit the Conference webpage at itsinfo.tamu.edu/twtc. We look forward to seeing you there!
